

Configuración de dokuwiki con acceso OAuth

Register application at the Google Developer Console Open Google Developer Console in your browser and log in into your Google Account. If you do not have Google Account yet, it is good time to create one. Click Create project... (you may see the page like this <http://snag.gy/MZaOh.jpg>). Fill new

project form, give some name and project ID (see <http://snag.gy/lpmxr.jpg>).  Google may ask you to confirm you contact phone with SMS or callback. "Evil Corporation" define their own rules. It's up to you to decide :) Open menu APIs & auth → Credentials (see <http://snag.gy/ZuLfU.jpg>) Form "Create Client ID" will be opened. Fill it: Application type: (required) choose "Web application"; Authorized JavaScript Origins enter your hostname (make sure http or https is the same for both settings). For example: <http://www.your-domain.com> Authorized Redirect URIs enter these lines:
<http://www.your-domain.com/doku.php?id=start&do=login>
<http://www.your-domain.com/start?do=login> <http://your-domain.com/doku.php?id=start&do=login>
<http://your-domain.com/start?do=login> <http://www.your-domain.com/doku.php/start?do=login>
<http://your-domain.com/doku.php/start?do=login> Instead of "your-domain" put your actual hostname

where DokuWiki is installed.  Note: if your DokuWiki is accesed with HTTPS then enter the URI with https, not http.

Click "Create client ID" button. Now you have page with all required information for plugin setup. You will need two values from here: Client ID and Client secret. Open menu APIs & auth → Consent screen. Fill "PRODUCT NAME" and e-mail address as well, or you can get this error <http://stackoverflow.com/questions/18677244/error-invalid-client-no-application-name>.
