MQTT Clients

Let the topic convey the information

home / [bedroom](#) / [d2ef08](#) / light 

home / [study](#) / [9a311e](#) / light 

home / [livingroom](#) / [ce20fe](#) / light 

command / ... / light status / ... / light telemetry / ... / temperature

- EMQX ports

Type	Bind
ssl	0.0.0.0:8883
tcp	0.0.0.0:1883
ws	0.0.0.0:8083
wss	0.0.0.0:8084

- Mqtt template to write to Influxdb

```
{
  "devices/+/messages": {
    "measurement": "devices",
    "tags": {
      "client_id": "$client_id"
    },
    "fields": {
      "temperature": ["$payload", "temperature"],
      "humidity": ["$payload", "humidity"]
    },
    "timestamp": "$timestamp"
  }
}
```

- Influxdb config

Set up InfluxDB through the UI

1. With InfluxDB running, visit <http://localhost:8086>.
2. Click **Get Started**

Set up your initial user

1. Enter a **Username** for your initial user.
2. Enter a **Password** and **Confirm Password** for your user.
3. Enter your initial **Organization Name**.
4. Enter your initial **Bucket Name**.
5. Click **Continue**.
6. Copy the provided **operator API token** and store it for safe keeping.
