

Influxdb

Tamaño de la base de datos

```
du -sh /var/lib/influxdb/data/<db name>
```

Respaldo (backup) Ejemplo: Respaldo del año 2019

```
influxd backup -portable -database test -host localhost:8088 --start 2019-01-01T00:00:00Z --end 2020-01-01T00:00:00Z /tmp/mysnapshot2019
```

Restaurar (restore) Ejemplo: Restaurar todo

```
influxd restore -portable path-to-backup
```

Bakcup de un docker corriendo

para entrar al servidor donde está el container de influx es ssh roo@aq.a.unloquer.org pero debés tenés la clave pública de ssh subida a digitalocean

<https://www.grzegorowski.com/how-to-backup-and-restore-influxdb-which-runs-inside-docker-container>

Backup una db

```
influx_inspect export -database aqa -compress -datadir "/var/lib/influxdb/data/" -waldir "/var/lib/influxdb/wal/" -out "aq-export-2020-04-03" 1) 2)
```

- Restore backup

Mover backup a dentro de un volumen visible en el container mv aqa* iot/influxdb/
