ESP32 + Display TFT 1.4 240x240

- https://arduino-er.blogspot.com/2020/07/esp32-13-inch-240x240-ips-lcd-st7789.html
- https://www.youtube.com/watch?v=PUV9_OdMcCA

- 7 pins are used to connect to MCU:

```
# Pin Label Description
  ;#####################################################################
  ; TFT_eSPI library setting here (no need to edit library files):
  ;#####################################################################
  -D USER_SETUP_LOADED=1                          ; Set this settings as
valid
  -D ST7789_DRIVER=1                              ; Select ST7789 driver
  -D TFT_WIDTH=240                                ; Set TFT size
  -D TFT_HEIGHT=240
  -D TFT_MISO=-1                                  ; Define SPI pins
  -D TFT_MOSI=19                                  ; SDA marcado en la
pantalla
  -D TFT_SCLK=18                                  ; SCL marcado en la
pantalla
  -D TFT_CS=5
  -D TFT_DC=16                                    ; Data/Comand pin
  -D TFT_RST=23                                   ; Reset pin del ESP32
  -D LOAD_GLCD=1                                  ; Load Fonts
  -D SPI_FREQUENCY=40000000                       ; Set SPI frequency
```
